Lacobel Colour Chart

Lacobel has a paint layer on the back of the glass. This protects it from any damage and keeps the colour and glossy appearance of the glass in brilliant shape. Lacobel glass can only be used for interior applications: furnishings, wall covering or even as writing board.

The paint used for Lacobel is environmentally friendly. It does not contain heavy metals or chemical substances that damage environment. There are also satin finish versions of some Lacobel glasses, under the brand name Matelac.

UV resistant	Yes	The colours are fixed during the production process (no discolouring possible).
Bending resistance	Yes	Identical to float glass
Bending/Fitting	Yes	See installation guide in www.yourglass.com
Easy to maintain	Yes	

> Benefits & Applications

- Lacobel glass have multiple applications for interiors, such as wall claddings, partitions, furniture, doors,...
- The Lacobel ranges combine a pure and contemporary look with an easy maintenance and a high resistance to stains.
- All Lacobel colours can be used in humid environments, such as bathrooms and kitchens.
- For extra safety a Safe film can be placed on the painted side of the glass. It allows for better protection in case of breakage, avoiding injury or damage.
- Manufacturing process guarantees a uniform finishing, ensuring that the paint adheres flawlessly to the glass.
- All Lacobel paints are environmentally friendly. No formaldehydes were detected based on the stringent JIS standard "Method for testing formaldehyde emission from paint film - Desiccator method" (version 2000).
