## **DANTALUX** Safety Back Mirror

Dantalux safety back mirror is a mirror which provide extra safety and security for interior application. It used a polyethylene film placed on the back painted side of the mirror - a smooth layer which, when applied to the back painted side of the mirror, guarantees maximum security in the event of physical impact or breakage.

This new feature will greatly enhance the creativity of any interior architect, designer, or individual. Dantalux safety back mirror can be affixed anywhere in the home.

### **Dantalux safety back mirror offers users two key advantages:**

1. The layer of back painted side of the mirror is protected from scratches and provide extra durability from harmful materials / chemicals which in touch with its paint surface.
2. And if the glass breaks, the shards will remain attached to the film (under impact no large openings will appear - thus avoiding serious injury or damage).

In the event of an impact with the glass side of the mirror, Dantalux safety back mirror is one of few mirrors that comply with AS/NZS 2208 – Grade A Safety Glazing Material.

Compliance to AS/NZS 2208 further enhance Dantalux safety back mirror application at home, office, or other high activity areas.

Dantalux safety back mirror can be used for wardrobe door mirror, vanity mirror, decorative mirrors, in the exercise rooms (gym, fitness centre, etc).

Safety back also available in other range of Asahimas interior products, such as Decomirror (Tinted Mirror) and Lacobel Painted Glass.

Safety Back	Product Name	Thickness (mm)	Standard Size (inch)	
			96 x 72	120 x 84
	Miralux	5	✓	✓
	Dantalux	5	✓	✓
		6	✓	✓
	Lacobel	5	✓	✓
	Decomirror	5	✓	✓
